

Three Degrees

Scalds from hot water. Contact with flames. Too much exposure to the sun. Just as there are different causes of burns, there are different degrees of burns: first-, second-, and third-degree. The extent of damage to the skin tells you what degree a burn is.

Do research about the three degrees of burns. See the Resources section for helpful websites to aid in research.

Type of Burn	Description	First Aid Measures
First Degree		
Second Degree		
Third Degree
