Party Placemats

Cut clean orange juice and milk cartons or cereal boxes into strips, and students can weave these into colorful place mats to keep their desks clean during class parties.

Materials

- Clean juice or milk cartons or cereal boxes (beverage cartons are more water resistant and can easily be wiped clean)
- Glue or dental floss

How To

1. Cut juice or milk cartons or cereal boxes into 1/2-inch strips.
2. Have students weave them into the size of a placemat.
3. Glue the ends to keep it together or weave dental floss around the edges to keep strips secure.
